The seminar will focus on Labor and Employment issues that will affect your business on an ongoing basis and the changes that we see on the horizon as a result of the administration change in Washington D.C. We understand that for many business employee cost is perhaps the largest line item expense in your enterprise. We have designed this seminar to help you be proactive as you deal with your labor force and labor costs.

The panel will discuss key federal employment legislation introduced and enacted during the first nine months of the Obama administration. The speakers will also focus on strategies that small businesses can use to remain union-free, comply with federal immigration requirements, and stay out of court.

Please be sure to RSVP with Maita Lopez at mlopez@kumarpathak.com so that we can plan for your lunch.
